

## CANADIAN SOFTWOOD INSPECTION FIELD REPRESENTATIVE

### Who is Canadian Softwood Inspection?

Canadian Softwood Inspection Agency, Inc. (CSI) and Macdonald Inspection Services have a proven history of providing exceptional quality third party inspection and certification services to the lumber manufacturing industries of British Columbia, Alberta, Saskatchewan, Manitoba and Ontario. Macdonald Inspection Services was established in 1966 and became the Canadian Softwood Inspection Agency, Inc. in 1994. In 2016 CSI was acquired by Timber Products Inspection, Inc., but remains doing business as CSI. As CSI continues to grow, we have the need to expand our staff of professional Field Representatives.

### What are the responsibilities of a CSI Field Representative?

As a CSI Field Representative, you will be responsible for the sampling and/or auditing of wood products to verify compliance to applicable standards and quality programs. You will also be monitoring plant records and training production staff. Because of the broad range of services offered by CSI, no two days are alike. Servicing a territory of various wood processing facilities, each day will require travel to and from different locations. Each CSI Field Representative works independently from a remote location, but is part of a pod of representatives that is overseen by a supervisor who provides support and assistance.

### What the benefits of working for CSI?

In addition to working for one of the most recognizable names in the Forest Products Industry, CSI also offers the following benefits:

- Medical, Dental and Vision Insurance for all fulltime employees; a 401K matching program; paid vacation, and a Partial ESOP.
- For all Field Representatives, CSI provides paid training and all the required tools for the positions once training is complete. This includes a vehicle, tablet and cell phone.

### What are the main characteristics of a CSI Field Representative?

Integrity

Strong Work Ethic

Desire to learn

*If these characteristics describe you—CSI wants to meet you!*
